## COUPON

Choose a **FREE** Treatment:

\* **One free service per person.**  
No Cash Value

- **Microdermabrasion**
- **Enzyme Facial**
- **Laser Hair Removal**  
(Underarms, Chin or Lip)

Exp. \_\_\_\_\_ Approval \_\_\_\_\_

### **Microdermabrasion**

Microdermabrasion is a simple, straight forward, non-invasive, procedure that revitalizes dull skin, reduces large pores, and improves fine lines. Most importantly, it allows you to get back to your daily routine immediately after treatment.

### **Chemical Peel**

While microdermabrasion works well on superficial skin imperfections (some acne scars, fine lines, wrinkles, enlarged pores and sun spots), a chemical peel is more effective on serious skin problems like deeper scars and wrinkles.

### **Laser Skin Rejuvenation**

Medical laser technology has evolved to provide non-invasive, "no down-time" treatments that help improve the appearance of fine lines, poor skin texture, facial veins, and birthmarks. A series of treatments will stimulate new collagen production in the skin, bringing back the suppleness of youthful skin.

### **Laser Pigment Treatment**

Age spots, which typically form on the back of hands, neck and face, are evidence of sun overexposure. And though these harmless groupings of pigments – color-containing cells – may fade over time, they represent damaged skin and never completely disappear. As your body ages your skin gets thinner. This heightens the visibility of age spots. While the damage can't be undone we can improve the appearance by lighting them with laser therapy.

### **Titan**

The Titan gives you an all natural option to actively turn back the clock on aging skin. Using light energy to stimulate new collagen growth deep beneath your skin's surface, Titan can tighten skin on your face, arms, abdomen, and legs. It's an ideal solution to enhance your youthful and healthy appearance without surgery, recovery time, or injections.

### **Laser Vein Therapy**

Laser therapy is a non-invasive procedure that safely and effectively treats many types of facial and leg veins, including spider veins and reticular veins.

### **Laser Hair Removal**

Laser treatment for unwanted hair is a non-invasive approach to permanent reduction and long-term hair removal. Treatment is specifically designed to eliminate undesired hair from specific parts of the body. Unlike many other treatment methods, Laser Therapy leaves your skin looking and feeling smoother and softer

### **Restylane/Juvederm**

Restylane and Juvederm are injected in small amounts under your skin to fill creases, lines, wrinkles or folds. It is also injected around the lip area to create volume, resulting in a more youthful appearance.

### **Botox**

The contractions and movements of the facial muscles are controlled by signals from the brain. Botox® simply prevents the muscle from allowing responses to these messages. As a result, the muscle relaxes and the overlying skin remains unwrinkled and smooth.
